DETAILED ACTION

Prelim./Amdt.

1. Receipt is acknowledged of the amendment filed 02/16/2006.
2. Claims 1-14 are pending.
3. In light of amendment to the claims and applicant's arguments, the rejection under 35 U.S.C. 112, second paragraph, is withdrawn.

Allowable Subject Matter

4. Claims 1-14 are allowed.
5. The following is an examiner's statement of reasons for allowance: With regard to independent claim 1, no other prior art teaches a method for producing a light channeling panel by cutting the first and second cuts through an entire thickness of the first sheet and the second sheets of transparent plastic, and the first and second cuts having opposite, substantially parallel walls extending inwardly at a specified angle from the inner surface of the first and second sheets. With regard to claim 2, no other prior art teaches a method for producing a light channeling panel by cutting the first and second cuts through the first sheet and the second sheets of transparent plastic, and the first and second cuts having opposite, substantially parallel walls extending inwardly at a specified angle from the inner surface of the first and second sheets, and fixing the first and the second sheet by transposing the edges of the first cuts with the edges of the second cuts. With regard to claim 3, prior art fails to disclose a method for producing a light channeling panel by cutting the first and second cuts through the first sheet and the second sheets of transparent plastic, and the first and second cuts having opposite, substantially parallel walls

extending inwardly at a specified angle from the inner surface of the first and second sheets, the second cuts through the second face extending partly through the sheet to just meet bottom edges of the first cuts made through the first face with borders around the periphery of the sheet and thin internal columns perpendicular to the cuts left uncut to support cut regions of the sheet, the first cuts through the first face and the second cuts through the second face meeting within the panel, as set forth in the claim. Claims 4-14 depend from claims 1-3. Therefore, claims 1-14 are patentable over the prior art of record.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
